FTI Wireless Network Control Offering

PURPOSE: To provide FTI Satellite Internet customers a cost effective method of monitoring and controlling their wireless network similar to the way you monitor and control your wired network.

- **The FTI Wireless Network Control Offering will:**
 - Improve performance and Reliability
 - Optimize network resource allocation
 - Enable quick troubleshooting of Network Problems
 - Profile users' consumption patterns
 - Profile applications' consumption patterns
 - Enable quick access to data by customer
 - Scale to monitor interfaces with multi-gigabit throughput
 - Enables long-term storage of report data.

 - **To insure reliability and security this system is located in the FTI Satellite Hub Network Operating Center.**

 - **24x7 remote monitoring.**

 - **All features and reports are available to the local system operator via Web Browser through a secure identification and password system.**

 - **Upgrades and maintenance diagnostics as well as back-up are performed by FTI certified Network Operations Technicians. Initial training and set up can be arranged.**

 - **Monthly Charge per Element or Device**
